To whom it may concern:

Supplier Six Sigma, LLC demonstrated great leadership, excellent communication skills, and outstanding project management skills while completing a Lean Six Sigma project for us on our main Tempura Chicken line during the second half of 2009.

They utilized Lean Six Sigma tools and methods to facilitate a team of engineers and managers, enabling us to reduce waste from our meat dicing operation by 67% in 4 months. In addition, overall quality of this important product was improved with far less variation.

They coached our team through the various project team meetings and worked with our resident experts to devise a solution that required minimal capital equipment.

The team also showed that they are experts in Lean Six Sigma and business improvement and also understood our business and the industry very well.

This line is our main line and is the most strategic for us. We did not have the resources to complete this project and Supplier Six Sigma, LLC came in and got it done!

I would recommend Supplier Six Sigma, LLC to any business looking for a quick and effective solution to their business problems.

Sincerely,
